

ErgoDeck Open Anti Fatigue Mat Tiles

ErgoDeck Open Anti Fatigue Mat Tiles are a modular comfort flooring system available in several configurations. Mats feature a firm mechanical connection, safety ramps and semi-permanent or floating installation. These anti-fatigue mats feature an efficient energy-return spring design which allows the highly durable PVC material to provide the optimum balance of durability and comfort for your workers.

The springs in these floor mats store energy and return it to workers' feet with each step, reducing fatigue and propelling them through the day. The open deck design is suited to areas where slip/trip/fall hazards may exist and anti-fatigue mats are also desired. Dirt, debris and fluids simply fall through the open areas in these anti-fatigue mats to the floor beneath for later removal.

An optional ToughGrit surface increases traction for Heavy Duty and General Purpose mats. Mats are fully customizable, resistant to water and oils and 80% recycled. Call for advice on measuring and ordering.

- **Heavy-Duty:** Heavy loads, impacts and cart traffic
- **General-Purpose:** Primarily foot traffic, softer compound
- **Comfort:** Resilience of rubber with PVC durability
- **ToughGrit** surface: (Heavy Duty and General Purpose)
- 3 year warranty on all ErgoDeck mats

Item #: FM.FERGOG

Interlocking Tiles

Size	Qty. 1-50	Qty. 51-100	Qty. 101-250
