

ErgoDeck Solid Anti Fatigue Mat Tiles

ErgoDeck Solid Anti Fatigue Mat Tiles are a highly customizable modular anti-fatigue matting system. These comfort mats are available in several configurations. Mats offer a firm mechanical connection, safety ramps and semi-permanent installation. An efficient energy-return spring design, allowing the durable PVC material to provide durability and worker comfort.

The energy-return spring design of these anti-fatigue mats stores energy and returns it to workers' feet with each step, propelling them through the day while reducing fatigue. The solid deck design of these mats is best suited for dry environments, although they are resistant to water and oils. Spills, dirt and debris wipe clean easily from the solid surface.

An optional ToughGrit surface increases traction for Heavy Duty and General Purpose mats. Mats are fully customizable, resistant to water and oils and 80% recycled. Call for advice on measuring and ordering.

- **Heavy-Duty:** Heavy loads, impacts and cart traffic
- **General-Purpose:** Primarily foot traffic, softer compound
- **Comfort:** Resilience of rubber with PVC durability
- **ToughGrit** surface: (Heavy Duty and General Purpose)
- 3 year warranty on all ErgoDeck mats
